3 次の文章を読んで、あとの(1)から(5)までの問いに答えなさい。

Japan is surrounded by the sea and people in Japan can see many kinds of fish and sea animals. However, it may be difficult for them to survive. In the world, about 8 million tons of plastic waste go into the sea every year. So, we should protect the sea for the future. This story is about the way to solve it.

You may know Aichi is famous for making things, such as pottery and cars. But do you know that, in 2019, Aichi produced the most plastic products in Japan, about 12%? Plastic parts produced in Aichi are (A) in stationery, electronic devices, and so on. A lot of plastic products are around people in Japan. They are useful and support their daily lives.

Plastic products are convenient, but plastic waste is causing some problems in the sea. Plastic waste on roads moves into rivers, and then they carry the waste to the sea. So there 【 in / is / our daily lives / from / plastic waste / a lot of 】 ^② the sea. Some people say that sea animals may eat the plastic waste and die. Other people say dangerous chemicals adhere to small pieces of plastic in the sea and fish may eat them. If we eat the fish, we may get sick. We should know plastic waste is a big problem not only for fish, but also for people.

Now many countries are trying hard to reduce plastic waste. One example is free plastic bags which people often use after shopping. In 2002, people in Bangladesh stopped using plastic bags for the first time in the world. In 2015, shops in the U.K. started selling a plastic bag for 5 pence. In 2018, people in more than 127 countries stopped using free plastic bags or any kind of plastic bags. In 2020, Japan started selling plastic bags instead of giving free plastic bags. In fact, Japan has reduced about three quarters of plastic bags for a year.

What should we do to reduce plastic waste? Aichi is running a campaign and trying to keep the sea clean. The campaign tells us that it is important to be interested in plastic pollution and take action. We should take our own bags for shopping instead of buying plastic bags after shopping.

The sea and the land are connected in nature. Our daily lives on the land influence many lives in the sea. Let's change our behavior as soon as possible. Taking action will make the sea cleaner.

4 彩 (Aya) と帰国を控えた留学生のボブ (Bob) が昼休みに教室で話しています。次の対話文を読んで、あとの(1)から(4)までの問いに答えなさい。

Aya: Hi, Bob. When will you go back to your hometown?

Bob: Hi, Aya. I'll go back to San Francisco next month.

Aya: 【 a 】

Bob: Wonderful! I have learned about Japan in our school since last year, so I often talk about it with my host family.

Aya: Please tell me more.

Bob: Well, I learned about QR codes in the class last week. So I talked about them with my host grandfather. I told him that the codes were made in Japan. Then he told me that he
() for a Japanese company which first invented the QR code in 1994.^①

Aya: Did he?

Bob: 【 b 】 When I went to a restaurant with my family, my mother sometimes scanned the code with her smartphone to pay the money after the meal. It was very convenient. The Japanese technology has supported our daily lives in America.

Aya: 【 c 】 Did you talk about anything else?

Bob: Yes, we talked about evacuation drills. I think it's another strong point of Japan. Japanese drills are different from American drills.

Aya: Is that so?

Bob: 【 d 】 Then fire alarms in the school make loud (A) suddenly, and let us know the drill has started.

Aya: I've heard that some schools in Japan have that kind of drill.

Bob: Great! During my stay here, I've known that many Japanese prepare for disasters, such as fires, earthquakes and heavy rain.

Aya: 【 e 】 My family has made an emergency kit and we keep it in the house.

Bob: Oh, have you? My host family knows how much food and water they should store, and
they also know () the local shelter is during a disaster.^② It's amazing!

Aya: Our family, too. It's important for everyone to prepare for an emergency.

Bob: I agree with you. After going back to America, I'll tell my family to store food and water in case of a disaster.
